## **PLAN YOUR SUMMER GARDEN NOW**

**ORDER EARLY**

**No Relaxation Affords the Peace of Mind**

**Which a Well Planted Garden Radiates**

For obvious reasons all stocks are again limited this year and although we have a sufficient supply, it is advisable to order early.

We have always advocated early ordering and particularly urge you to do so now, so that your order will be filled completely in the best available quality.

We take pleasure in announcing our new address: Hunting Ridge and Haviland Roads, where we have ample facilities to display our many choice bulbs and plants against a well landscaped setting of exceptionally fine old trees and shrubs.

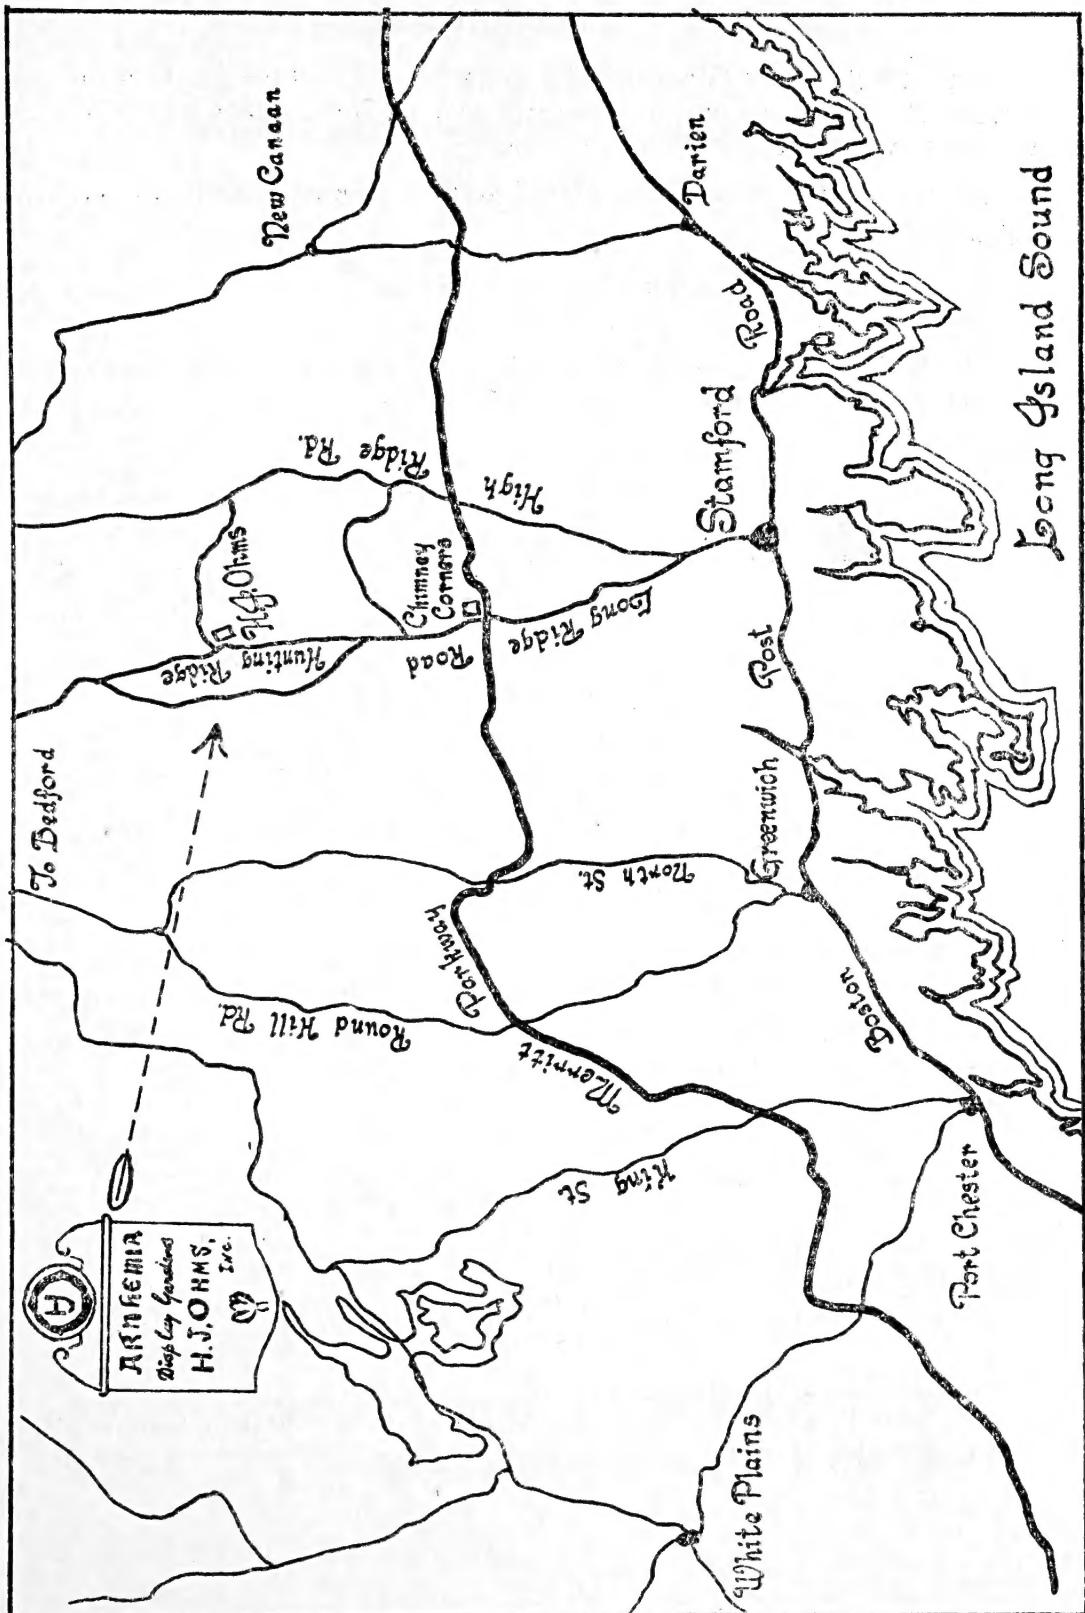

Although present conditions do not permit us to carry out our plans just yet, we are making preparations for a planting of such material listed in this catalogue and we believe that you will find a visit to "ARNHEMIA" interesting and a pleasant change; garden lovers will be very welcome at any time. The map on the next page tells you how to reach us.

We shall be very glad to assist you in the solution of your garden problems; talk to us about them and we shall be very glad to make a plan for you and select the proper material, no matter how small your garden.

## CARE AND CULTURE OF GLADIOLI

Select a sunny location away from the roots of shrubs and trees; plant 4 to 6 inches deep and 4 to 6 inches apart in a well worked trench in staggered rows. Be sure to keep well watered at all times, also keep the soil loose.

Although our Gladioli are guaranteed to be free from thrips, these insects can be easily transmitted from elsewhere. It is thereby advisable to watch for them when plants are about 3 inches tall and if found, spray weekly with the following solution:

One rounded tablespoonful of Paris green  
Two pounds of brown sugar  
Three gallons of water.
